FUNDING CONCEPT ABROAD

AWF currently supports selected partner organizations in the field of education in three African countries, Tanzania, Ghana, and Ethiopia. Funding is provided for projects, but also for institutional strengthening and professionalization at the request of the partners. Partnerships are characterized by a high degree of ownership by local project managers, joint learning processes and close strategic exchange.

AWF is interested in establishing further partnerships with local organizations if they are strategically beneficial to both sides. The establishment of a partnership is fundamental, and we therefore advise against the submission of projects. If you are interested in talking to us about partnership opportunities, please contact the respective AWF managers (see contact on website).
