Foundation

Education, Social, Culture

FUNDING CONCEPT ABROAD

The Arthur Waser Foundation supports selected partner organisations in the field of education in currently three African countries: Tanzania, Ghana and Ethiopia. Support is provided for educational strategies, and – upon request from partners – for institutional strengthening and professionalisation.

Partnerships are characterised by a high degree of ownership by local project leaders, shared learning processes and close strategic exchange.

Establishing a partnership is fundamental, and we therefore advise against submitting unsolicited project proposals. If you are interested in entering into a dialogue with us about the possibility of a partnership, please contact the relevant programme officers (see contact details on our website).
