

Funding Criteria International Engagement

Please note that the Arthur Waser Foundation (AWF) works exclusively with local partner organisations.

The AWF collaborates with long-standing partner organisations in the African countries of Ghana, Tanzania, and Ethiopia and does not accept other project proposals.

The Foundation supports educational strategies at various levels of education:

- Early childhood and school education, as well as educational architecture, with a focus on Montessori pedagogy
- Technical education with an emphasis on solar energy / photovoltaics
- Sustainable agriculture
- Institutional strengthening and professionalisation of partner organisations

Our partnerships are characterised by joint learning processes, a high level of ownership and responsibility among local project leaders, and close strategic exchange.
